

(Eight Treasure Congee) Granule Canning Machine **BWKGJ18A/32A/42A**

Based on digesting and absorbing domestic and international same equipment, the machine is specially designed for rationed filling of mixed materials. It is suitable for small volume filling. It adopts the telescopic rationed filling mode and its volume is precisely adjustable.

The filling will not be executed in case of no can. It adopts PLC control and the production capacity is controlled through frequency conversion speed adjustment with touch screen operation.

The machine is especially suitable for filling solids in eight treasures porridge manufacturers.

The machine adopts PLC, frequency converter, human-machine interface controlling system, having the advanced controlling technologies, such as frequency control, no can no filling and so on. The accurate production rate and quantity will be displayed on the touch-screen via the kinds of sensors on the machine. Moreover, the production rate can be set on the touch screen. The main motor and other electrical equipment are all in a protection state. Meanwhile, all of the malfunctions can be found out easily, because they will be displayed on the touch screen. The main electric and pneumatic components of the machine are famous imported brands, and it also can be disposed of according to the client's requirements

Technical Parameters:

Model	BWKGJ18A	BWKGJ32A	BWKGJ42A
The number of filling bead	18	32	42
Can Diameter	Φ52~99mm	Φ52~99mm	Φ52~99mm
Can Height	50~160mm	50~160mm	50~160mm
Production capacity	80~250c/m	80~500c/m	80~600c/m
Power	2.2kw	3kw	3kw
Weight	1400kg	1500kg	2000kg
Dimension	2000×1800×2000mm	2440×2000×2000mm	2400×2000×2000mm
