

## LT Series Aluminum Tube Filling & Sealing Machine

### Feature

- Aluminum Tube Filling & Sealing Machine can obtain multiple end closure methods such as double folding, triple folding and saddle folding on a single machine by different mechanical hands.
- Fully automatic control system completes the whole process of supply, washing, marking, filling, folding and closing, coding and output.
- Pneumatically complete the supply and wash pipes, with accurate and reliable action.
- The machine adopts Taiwan touch screen and PLC control system to realize contactless operation, intuitive, convenient and reliable operation.
- The machine has compact structure, automatic tube-feeding and fully closed drive parts.
- Automatic calibration is completed by photoelectric induction.
- Intelligent temperature control and cooling system for easy operation and convenient adjustment.
- Quantitative memory and quantitative shutdown device are provided.
- Material contact part is made of 316L stainless steel, which is clean, hygienic, \* in accordance with GMP requirements of pharmaceutical production.
- Safety device, door opening and stopping, overload protection.

### Characteristic

<b>Sealing speed</b>	80-125 pcs/min;
<b>Sealing range</b>	3-25ml;15-50ml; 30-300ml can be customized
<b>Tube height</b>	50~350 mm can be customized
<b>Tube diameter</b>	12~50 mm can be customized
<b>Control System</b>	PLC or button control
<b>Size</b>	2500*1400*2200 mm
<b>Filling accuracy</b>	±0.5g
<b>Power</b>	3KW ; 380V/50HZ
