

## YPJ type Capsule Polishing Machine

YPJ type capsule polishing machine (capsule polishing machine, medicine polishing machine) is the application of brush, polishing for enclosed conveying structure, the body parts in contact with the drug made with nontoxic, corrosion resistance of materials, and conform to GMP requirements. Has the advantages of simple structure, is not easy to damage, long service life, convenient operation and maintenance, good polishing performance, higher efficiency, is a kind of special equipment for pharmaceutical, can polish and clean powder on the attached to the capsules and tablets, the polishing of the capsule is more bright, clean and beautiful.

The machine has two types: speed regulation (YPJ-818) and non-speed regulation (CD-818).

### Usage

Used for rapid clear adhesive powder on the surface of the capsules, tablets, to make it clean, so as to improve the surface finish.

### Characteristics

Max. productive capacity		7000 pcs/min
Power		220V 280W
Dimension (mm)	Overall	1150×400×1000
(L×W×H)		
	Packing	1300×540×1040
Weight (Kg)	Net	45
	Gross	65
