

The servo motor is used to control the number of driving circles of the screw conveying powder, so as to accurately control the raw material powder to be packed into the silverbottle according to the required capacity and cover the rubber stopper tightly.

**Features:**

High speed disc packer: continuous bottle feeding and stoppage, intermittent packing. It has bottle knockout, no bottle no packing, no bottle stopper, and automatic sampling function.

Technical Parameters:

Model	FGP4
Power Supply	3 phases, 380V/50HZ
Power Supply	6KW
Vaccum	-0.066MPa, 14m³/hr
Noise Level	≤65db
Capacity	22000
Tolerance	≤±2%
Completion Rate	0.995
Dimention	3240*1100*1800
Feeding Height	900±20mm
Weight	1400kg

Capacity						
Model	7ml	10 ml	15 ml	20 ml	25 ml	30 ml
FGP4	22000	22000	19000	16800	15000	12000
