

Automatic Alcohol Vial Filling Machine

This machine is independently developed by our company on the basis of absorbing foreign advanced technology. It is widely used in food, pharmaceutical, chemical, scientific research and other industries. It can be used for various low-dose liquid filling caps, such as medical alcohol, oil, injection and so on. It meets GMP requirements.

Eight Competitive Edges of Our Automatic Alcohol Vial Filling Machine:

1. The machine is set by microcomputer and can carry out high-precision filling. The host adopts stepless frequency conversion speed regulation.
2. It can quantitatively control the automatic production capacity.
3. When the machine breaks down, it will automatically give an alarm, which can adapt to low pressure, no liquid filling, no inner cover and so on. The machine can stop automatically without filling and inner cover.

Technical Parameters

Filling volume	5-100ml
Loading error	$\leq \pm 1\%$
Rotation (rolling) Cover pass rate	$\geq 99\%$
Production capacity	30-50 BPM
	60-90 BPM
Power supply	380V/50Hz
Power	2.0 kw
Weight	600 kg
Dimension	2000*1000*1500mm
