

B·GFN-30 Inner-Heating Filling Sealing Machine

The inner-heating filling sealing machine is a multi-function machine. First, it can fill cream-like and liquid-like materials into plastic tubes or plastic-aluminum laminated tubes. Second, it can seal and cut end and press dates or product number on it. So it is widely in many industries, including daily cosmetics, medicine and food industries and other industries. This equipment will accurately dispense products that are water-thin to viscous gels, mascaras to lipstick, shampoos, serums, lotions, and creams.

Features:

1. We use the efficient heater and stable flow meter originated from Germany.
2. Thermo-air heating system enables the sealing end is firm and nice.
3. This inner-heating filling sealing equipment can match with many kinds specification of filling nozzles, meeting the needs of different thickness.

Main Technical Parameters:

| | | | |
|-----------------------|-------------------------|----------|-----------|
| Power supply | 380(220)V/50Hz | | |
| Air source | 0.6-0.8MPa | | |
| Air consume | <0.6m ³ /min | | |
| Filling quantity | 10-50ml | 50-100ml | 100-200ml |
| Dosage precision | ≤±5% | ≤±3% | ≤±2% |
| Production speed | 25-30pcs/min | | |
| Tube diameters sealed | φ16-φ50mm | | |
| Dimensions(L×W×H) | 1100×790×1500mm | | |
| Weight(kg) | 260kg | | |
