

Multi-sided labeling machine BCDT60-02

Loading→Separation→Deflection→Upper and lower labeling→Side labeling→Pressing→Online inspection and removal→Finished product.

This equipment is suitable for multiple labeling of various paper boxes, cartons, plastics, metals and other materials (such as three sides of paper boxes, three sides of gift boxes, top and bottom of cosmetics, etc.). It is independently developed and designed by our company for customers with special labeling requirements.

Features:

- Servo motor supply system ensures stable and fast supply of labels and ensures the speed and accuracy of labeling.
- Equipped with labeling mechanism according to product process characteristics, with wide applicability.
- Touch panel human-machine interface, easy to operate and learn. With multi-group memory function. Easy to change different specifications without adjusting settings. Can be called directly. With time-saving and labor-saving features.
- Multi-point emergency stop button to ensure safe production.
- It can be equipped with real-time printing engine to interface with logistics system for online printing, labeling and tracking.

Technical Parameters:

Model	BCDT60-02
Labeling speed	0~60 pieces/min
Labeling precision	± 1 mm
Label Range	Length 20~400mm
Air pressure	0.5~0.8MPa
Voltage	110/220V 50/60 HZ
Power	0.7KW
WeightQuantity	550 kg
Machine size	L:1500mm W:700mm H:1600mm
