

## *DZQ-850/2SA Double Chamber Vacuum Packing Machine*

The DZQ-8502SA double-chamber vacuum machine is an advanced and highly efficient packaging device specifically designed for vacuum sealing of food, pharmaceuticals, and other products. It features two independently operating vacuum chambers, allowing users to process multiple packaging bags simultaneously, significantly enhancing work efficiency and production capacity.

### **Product Description**

#### **Advantage**

- Made of 96% stainless steel.
- Patented technology allows for easy transfer of the 850 vacuum cover to another chamber.
- Optional vacuum pumps available (100-200m<sup>3</sup>); larger m<sup>3</sup> provides greater suction power.
- Equipped with concave vacuum chambers to effectively address product space issues.
- Controlled by a PCB board.
- Optional inflation function available.
- Removable sealing bars for easy and convenient replacement of heating wires.
- Features a separate electrical control box for quicker maintenance and inspection.
- Includes a cooling fan to effectively reduce heat generated by the large vacuum

## Technical Parameters

Model	DZQ-850/2SA
Voltage	3phase 220/380V 50-60Hz
Pump Power	4kw
Pump Capacity	200m <sup>3</sup> /h /Option
Sealing Length	850mm (x4)
Sealing Width	10mm
Cover Size	1050x830x210mm
Dimension	2060x940x1115mm
Weight	≈510kgs
Certification	CE ISO
