

## *MIC-120 Cartoning Machine*

The MIC-120 Multi-Function Cartoning Machine is the latest innovation from Jiangsu Mic Machinery, designed to offer a wide range of applications and exceptional production efficiency. This multi-functional machine can be integrated with pillow packing machines, three-side sealing machines, and other food packaging equipment to achieve optimal results.

Perfect for packaging a variety of regular items such as bagged food, tray food, frozen foods, and small long-body products, the MIC-120 is also well-suited for use in industries such as pharmaceuticals, cosmetics, and more. With its broad application scope, the MIC-120 can be customized to meet specific user requirements. The machine features quick mold adjustments, making it easy to switch between different product types. Additionally, assembly and debugging are straightforward, ensuring smooth operations.

Whether you're producing a single product in large quantities or a diverse range of items in smaller batches, the MIC-120 Cartoning Machine is a highly efficient solution to meet your production needs.

## Parameter

Packing speed		≤120Cartons/min
The carton	The quality requiremants	250-350g/m <sup>3</sup>
	Size range	(70-210)x(15-90)x(15-80)mm
The instructions	The quality requrements	60-70g/m <sup>3</sup>
	Unfolded size Range (1-4 folds)	(130-190)x(90-130)mm
The compressed air	Main motor power	≥0.16m <sup>3</sup> /min 0.6mpa
Main motor power		1.5Kw 220V/380V 50HZ
overall dimensions		3100x1100x1800mm
The whole machine net weight		1300kg
Hot melt adhesive machine	Selected by customers (our compeny usually USES domestic Jingtai or imported Lebest)
