

## ***GZ series air drive ointment and liquid double-duty filling machine***

It is a mini liquid filling machine. The machine is applied to quantitative filling ointment or liquid into various containers.

This machine is widely used in pharmacy, foodstuff, cosmetic and chemical etc industries.

Such as: tooth paste, ointment, syrup, jam, shoeshine, oil paint, printing ink, drink, paste, snowflake cream, magma, butter, lube, alcohol, pesticide, and so on.

### **Features:**

- 95% parts that contact with the materials are made of high quality stainless steel, no easy pollution, easy cleaning, meet the GMP standard.
- Its structure is reasonable, adopts pedal and automatic adjust filling volume, easily operation and maintenance.
- This machine is controlled by compressed air, so it is suitable in anti-explosion or moist environment.
- It is an economical and applied filling machine, It is applied to trial manufacturing or batch produce in small scale in factory, lab, hospital, science research department or in house use it.
- The machine adopts vacuum reclaim and split second stop flow device, no leakage, save materials and time, guarantee filling effect.

Many in last year's, this machine won the large customer's good opinion by excellent quality and very low price.

There are some counterfeit products on market now, please keep away them.
