

DZ-500 Automatic Electric Vacuum Bag Sealing Machine for Food Packing

The DZ-500 Automatic Electric Vacuum Coffee Powder Bag Sealing Machine offers a high-efficiency, fully automatic solution for vacuum sealing powdered or granulated products such as coffee, tea, grains, and a variety of food-grade materials. Built with a stainless steel single-chamber structure and equipped with intelligent PLC control, this machine enables vacuuming, sealing, and cooling in one seamless operation, extending product shelf life by preventing oxidation, pests, and moisture. Its intuitive control panel, durable pump and motor components, and universal compatibility with packaging types like bags, pouches, bottles, cartons, and more make it ideal for industries ranging from food and beverage to hardware and textiles. Compact at 760×700×1050 mm, it delivers long-lasting performance, operates at 1–4 packs per minute, and comes with a 1-year warranty and robust after-sales support to ensure consistent, reliable packaging results.

Technical Parameters

Model	DZ-500
Power source	220V 50Hz
Power	1.8KW
Workroom size	525*525*80mm
Sealing length	500*10mm
Sealing speed	1-4 pec/min
Weight	120kgs
Machine size	760*700*1050mm
