

YLC-20 Electric Ultrasonic Automatic Pipe Filling and Sealing Machine

This automatic soft plastic tube filling and sealing machine is engineered for efficient packaging of semi-viscous products such as toothpaste, cosmetic creams, pharmaceutical ointments, and food pastes. It integrates tube loading, orientation, filling, hot-air sealing, trimming, and coding in one compact system. Supporting multiple tube sizes and materials, it ensures a neat and secure seal, making it the perfect choice for small and medium-sized manufacturers seeking automation and consistency in tube packaging.
