

SJ1000/2000 Back-Sealing Liquid Machine

The equipment features 304 stainless steel components that come into direct contact with materials, ensuring compliance with food and pharmaceutical hygiene standards. Its design makes the machine highly convenient for adjustment, operation, and maintenance across various industries. Key parameters such as bag length and packaging volume can be manually adjusted, offering simple and intuitive operation. The machine automatically handles all processes—including thread preparation, weighing, filling, sealing, cutting, counting, and batch-number printing—while using PE film as the packaging material. Optional accessories like color-coded coding systems, conveyor belts, and dust-proof covers are available, and the equipment can also be customized to meet specific customer requirements.

Technical Parameters

Model	SJ1000	SJ2000
Bag-making size (length)	50-150mm	50-250 mm
Bag-making size (width)	40-150 mm	40-175mm
Membrane width	100-320 mm	100-380 mm
Bag capacity	50-550 ml	200-1000 ml
Packaging speed	33-37 packs per minute BPM	19-22 packs/minute BPM
Power supply	220V/AC 50Hz 1.6kW	220V/AC 50Hz 2.5kW
Machine dimensions	880x760x1800mm	1050x850x2050mm
Machine weight	275Kg	380Kg
Scope of Application	Suitable for liquids in industries such as food, pharmaceuticals, and chemicals—including milk, soy milk, soy sauce, vinegar, rice wine, and various other liquids.
