KDL-280 Semi-Automatic Ointment Filling Machine

The KDL-280 is a semi-automatic ointment's filling machine.
It is applicable on filling ointment, creamy products cosmetic products, etc.

This machine is designed for the filling of sticky liquid without being affected by thickness of the container. The operation principle is by the motion of cylinder piston. A precise amount of filling can be achieved to ensure the exact capacity.

For dealing with the filling of sticky liquid, with high density in traditional way, this machine calls only for a minor adjustment for easy operation.

This machine is also with reinforced surface hardness for it's piston is treated with chrome galvanized. And the panel is made of stainless steel which is very for washed clean up.

Suitable for the filling of cosmetics, drugs and food.

Technical data:

Model	KDL-280
Filling Capacity	5 cc~60cc 30cc~150cc 100cc~500cc
Speed	20~30 pcs/min
Motor Power	1/2 HP (AC Motor)
Source Power	220V AC 60/50 Hz
Machine Dimension	900 L x 500W x 1550H
Machine Weight	150 kgs
