

GSZ filling and capping machine

The machine is applied for filling and capping glass bottle, plastic bottle from 30ml to 500ml.

It has stations of linear type filling, mechanic way to put stopper and, cap putting, capping/screw capping. The machine is easy operation and maintenance, small size, and can be connected to other machine into compact producing line.

Main technical parameters:

Productive capacity	Less or equal to 40-60 bottle/min
Filling accuracy	-0,03
Stopper putting station	1
Qualified stopper putting	More or equal to 98%
Qualified cap putting	More or equal to 98%
Qualified capping	More or equal to 98%
Power supply	380V,50 hz
Power capacity	1.5 kw
Machine weight	650 kg
Outside dimension	2400×860×1450
