

ZSCGN-208 Model Semi-Automatic Capsule Filling Machine

This machine is adopted with micro-computer PLC, touch panel operation, It frequency governors, electronic auto counting device, can automatically complete the placing, separating, filling and locking for capsule respectively, decrease the work intensity, increase the output capacity, meet the requirement of pharmaceutical sanitary. Novel structure, good-looking appearance, ease of operation, it is suitable for filling domestic and imported capsules. It is ideal equipment for filling capsule medicine in pharmaceutical Industry at present.

Capacity (10 thous pics/h)	1-2
Total power	280V/50Hz 3.1kw
Suit for capsule style	0#1#2#3#Machine made standard capsule
Air Pressure (Mpa)	0.4-0.6, are supply $\geq 0.1\text{m}^3/\text{min}$
Vacuum (m^3/h)	40
Overerall dimensions (mm)	1200 \times 720 \times 1600 (L \times W \times H)
Weight (kg)	330
