

## *Bag Chinese Medicine Decoction Piece Packing Machine*

The machine can complete various functions including quantitative weighing, automatic feeding, film forming and bag making, automatic sealing, automatic punching, automatic printing date cutting and counting.

Application: dry granular food, medicine or similar products. For example: Chinese medicine tablet, snack food, puffed food, seed dried fruit, coffee (granule/bean), tea, candy, baked goods, rice, nuts, chili, pasta, pet feed, etc.

Other non-food products, such as nuts, screws, gaskets and other metal products, and other block products.

### **Technical features:**

- Combined weighing and vertical machine into a whole (two in one technology).
- There's only one frame, one control system, one power supply.
- Save space, convenient installation and debugging, convenient cleaning.
- Suitable for small and medium-sized bag packaging, high speed and high precision.

### **Options:**

- The transverse sealing mechanism is driven by servo motor
- Punching mechanism for bag head
- Bottom Angle insertion mechanism
- Easy to tear mouth device
- Sponge exhaust function
- Coding mechanism (ribbon coding/thermal transfer printing)
- Nitrogen flushing plant
- Discharge conveyor

- Bag cutting function
- Automatic feeding hoist

**Technical parameter:**

Range	1-50g
Materiel	Tubers
Model	full-Automatic
Speed	10-50bag/min
Form	in bags
Products	Traditional Chinese medicine yinbian, scented tea, pharmaceutical particles
