

## Cellophane Film Packing Machine (COM-250)

Suitable for single auto package of various box products in drug, health product, food, cosmetics, stationery and office supplies audio-video product. Such as packing box drug, poker, VCD, tape, cigarette, rubber eraser, napkin paper and etc.

Three Prevention: Antifogging, damp proof, dust-free.

Three Improvement: Improve product value, improve product grade improve decorative quality. On the basis of absorbing and digesting foreign equipment, this machine is designed and reformed refined. Take imported PLC person machine interface control and action take cylinder moving, falling film system take servo electrical engineering control. It can arbitrarily regulate the falling film size, stable and reliable in operation, a film seal, smooth beautiful and exempt from maintain.

The pull line on the transparent packing film can be printed various color of enterprise sign or name, can bring antifogging laser and phosphorescence is one of the best antifogging methods, is fairly suitable for the package of top class famous products, if applying it, easy to pull seal and break bale.

### Technical Parameters:

Model	COM-250
Production capacity	20 pcs/min
Package size	(40-200) x (30-140) x (10-40) mm
Voltage	220v 50-60hz, single phase
	380v,60hz,three phase for special order
Motor power	0.75W
Electric heating	4W
Overall size	3080x900x1600mm
Weight(kg)	1200kg
