

JZGY series Automatic Liquid Filling Machine Line

The machine adopts the principle of time control flow design, precise filling volume, especially suitable for filling health wine and liquid, high foam, low viscosity products, the majority of wine, cosmetic, detergent, pharmaceutical and food industries with low viscosity ideal for filling machinery products

Technical parameters:

- Suitable container: Cylindrical bottles, flat bottles, square bottles and shaped bottles
- Filling capacity: 30-5000ml
- Filling speed: 1500-10000p/h (depending filling volume and filling head depending on the number)
- Filling accuracy: + -1% Time Control Flow
- Vacuum backflow control surface +-1mm
