

## *PCM-20H Rotary Direct Flow Type Liquid Filling Machine*

The machine uses fully automatic PLC and HMI control is rotary liquid filling in one of the most technologically advanced products. Level and the amount of time control, high degree of automation, large production capacity. All innovative ideas drip control, no leakage. Free gas for filling liquid material specifications.

### **Technical parameters:**

- ◆ Motor power: 1.5 Kw
- ◆ Number of filling heads: 20, 24, 30 filling heads optional
- ◆ Filling capacity: 50~1000ml
- ◆ Production speed: 6000~9000 bottles/hour (500ml water for example)
- ◆ filling accuracy:  $\pm 0.5\%$  (250ml or more for example)
- ◆ Dimension: 2000×1300×2100 mm
