

FRS-3 Standard Heat Shrink Sealing Machine

FRS-3 heat shrink sealing, sealing standard machine are installed in the SP-83 transport plane. With the help of electric pipe heating, automatic temperature control and hot air circulation, it can automatically seal the bottle and standard as soon as the bottle arrives. It could be an ideal choice for customers.

SP-2 type conveyor series length is 2 meters, 4 meters, 6 meters, etc.; The forms are packing lines which combine single row, double row, multi-column with filling machine, sealing machine, labeling machine, aluminum foil sealing machine, inkjet printer etc..

Performance advantages:

- ◆ Function interface - automatic temperature control, intuitive response through the instrument
- ◆ Electrical components –using internationally well-known brands to ensure safe and reliable equipment.
- ◆ Mechanical parts - the main parts of the machine are made of high quality stainless steel 304.
- ◆ Maintenance situations - the machine meet the GMP requirements, easy to disassemble, clean and maintain.

Technical parameters:

- ◆ For cover categories: plastic cap
- ◆ Power supply: 220 V/380 V
- ◆ Maximum production speed: 6000 bottles/hour
- ◆ Power: 7.0 kw
- ◆ Dimension: 600×500×600 mm
- ◆ Weight: 40 kg
