

Automatic Double-Faced Sticker Label Machine

The machine are adopted stand-up label method, installed the special orientation and pressing equipments to make the bottles steady. The head can be adjusted up & down, front & back and slantways. It is suitable for labeling the parts of different shapes bottles. It is also installed special pressing stickers equipment to make the labels unkindly. It is also adopted pursuing of revolving coder, the delivery belt can be adjusted optionally, and the speed of out labels will be the same.

The machine are adopted the touching display operation, magic eye checking and PLC controlling, pursuing of revolving coder, transducer timing to effect the real robotization. It is special suitable for the symmetry and non-symmetry containers of wine, food, cosmetic and label double-faced stickers on the shapes of flat, square, oval, column form, conform and other anomalistic.

Technical Parameter:

- Object to Apply: flat, square, oval, column form, conform and other anomalistic containers .
- Container Range (mm) : Width 30-300 Thickness: 20-1 20
- Label Range (mm) : Length 1 5-300 Height: 15-170
- Label Speed (It bears on the size of the container and ladel) (pc/min): 0-200
- Label Precision (mm): ± 1
- Power: 220V 50/60HZ 0.5KW
- Weight (kg) : 480
- Measurement(mm)(L*W*H): 2440* 1200* 1600

We can customize your order if you have special demands.
