

FWD-503 Semi-automatic Inner Heating Soft Tube Filling & Sealing Machine

This semi-automatic sealing and filling machine is widely used in toothpaste, cosmetics, pharmaceuticals, food and chemical industries.

1. This semi-automatic sealing and filling machine is suitable for filling all kinds of fluid material like face cream into the plastic tube or the aluminum-plastic laminated tubes.
2. The semi-automatic sealing and filling machine can be used independently and can also form a production flow line with other equipment such as the automatic packaging machine and etc.

Technical Parameters:

Item	Data
Speed	20~40pcs/min(according to filling volume)
Apply Volume	5-250ml(Max:Min Volume=10:1)
Air Supply	0.6~0.8Mpa
Apply Diameter of Tube	12.5-50mm(different diameters need to change mould)
Power	3.5kw
Power Supply	220V 1Phase 50Hz
Net Weight	450kg
Dimension	1200*1000*1500mm
