

## ***Bottle Unscrambler Machine JF-A100***

Our company is specialized in pharmaceutical and food machinery in China. This machine is equipment that can automatic packing bottles automatic transport bottles. This type is suitable for plastic bottle sorting, can make different size different type plastic round bottles.

### **Introduction**

Unscramble bottle machine is used for loading and oriented supply of round plastic containers to the automatic line.

Bottle sorting machine is used for arranging and split charging of the plastic round bottles and some special type bottles. Different size containers determine different disc sorters relatively and easy to change the disc sorter for different size container within 5mm.

Unscrambler has been widely used in the industries such as pharmacy, food, chemical engineering, etc., It is fully conforming to GMP certification requirements.

Semi-automatic unscramble is suit for glass bottles, Some special materials Bottles with special requirements from customers, this type is best choice.

### **Main Features**

1. This bottle unscramble machine is equipped with quantity control system and overload protection device.
2. Bottle Unscrambler is a machine with convenient operation, easy maintenance and steady performance.

3. Round bottle unscramble made up of high-quality 304 stainless steel, easy to clean and sterilize. Meet GMP standards.

4. Smart structure, stability, replacing parts easily, small occupation area, low cost;

### Technical Parameters

Item	JF-A100
Applicable target	15-150 ml round bottles ,and some irregular bottles
Production capacity	30~100 bottles/min
Description for production capacity	Capacity is subject to the type and size of the bottles
	● BPM=Bottles per minute
Power consumption	220V/50HZ/ 0.15KW
Size(mm)	950×950×1000mm
Material	304 stainless steel
Control System	Mechanical control
Pressed Air Supply	0.6 Mpa
Weight	220Kg
