

## *PZH-200 Multi-Function Continuous Automatic Cartoning Machine*

PZH-200 automatic continuous high-speed cartoning machine is a high-performance product integrating electromechanical, gas and light based on the introduction of foreign advanced equipment. It meets GMP requirements. The machine is a continuous operation, automatic box opening, manual folding (1-4 fold), printing batch number sealing detection and other functions (can also be equipped with hot melt adhesive device), the highest speed up to 200 boxes / min, suitable for medicine, food, In the daily cosmetics, chemical, hardware and electronics industries, the packaging of medicine plates, hoses, medicine bottles and block items can be linked with the equipment of the blister packaging machine and the filling machine, and also with the heat shrinkable film, automatic cellophane packaging machine, pillow packaging machine, etc. are online.

### **Feature:**

1. The machine adopts PLC man-machine interface control system, and the inverter, servo motor and pneumatic components are all selected from international famous brand products.
2. No product, no instructions, no box; no manual, no box.
3. No paper box, product entering the box is not in place, automatic alarm or stop.
4. Air pressure and vacuum protection stop, the main drive has overload protection device.
5. Very easy replacement of product specifications through the dial handwheel.
6. Product delivery pusher drive.
7. PLC automatically displays the loading speed and counting.

**Technical Data:**

Power supply	Ac380V 50Hz, 3kW
Air consumption	20-160L/Hour (Pressure 0.5-0.8M)
Working pressure:	0.5-0.8Mpa
Packaging speed	120-200boxes/minute.
Paper Box Quality Requirement	Carton requirements: 250-350 g / m <sup>2</sup> (depending on the size of the carton)
Paper box Requirement	Max. Size: L200x80x50mm (LxWxH)
	Min. Size: L50x20x14mm (LxWxH)
Outline Size	4200x1200x1600mm
Weight	1700Kg
