

GFTB-1B Semi-automatic Round Bottle Labeling Machine

GFTB-1B semi-automatic round labeling machine is an ideal equipment for semi-white labeling on round bottles in daily chemical, food and beverage, pharmaceutical, chemical and other light industry industries.

Performance characteristics

The machine has a reasonable structure, reliable performance, simple operation, and uses photoelectric detection.

1. Adopt advanced labeling mechanism to ensure labeling accuracy.
2. Can label a variety of bottles with strong adaptability.
3. The optical sensitivity of the label can be adjusted. It can be used to identify and compare the sensitivity of the base paper of different transmittances and adjust the sensitivity. It can make the best adjustment to the labels with different lengths to ensure normal labeling and smooth and accurate labeling.
4. Most of the agencies including racks, label feeders, blocking rods, and fasteners are made of stainless steel and aluminum profiles, ensuring GMP environmental requirements.
5. All system control components have international standardization certification, and undergo strict rigorous factory assessment test to ensure the reliability of various functions.

Technical Parameters

Maximum output of single non-position labeling	50 pcs / min (related to bottle and label size)
Labeled bottle outer diameter	20-90mm (other models need debugging)
Power	50W
Power Supply	220v \pm 5% 50hz optional 110v \pm 5% 50hz
Dimensions (length x width x height)	640x350x460mm
Weight	30KG
Standard speed	3-15m/min
Standard adherence (excluding package and label errors)	0.5mm
Minimum label length	10mm
