

DP-12/DP-25 Single Punch Tablet Press Machine

Researched and developed successfully by absorbing advanced technologies from abroad, the machine is a continuous automatic tablet press used for pressing powder and granular raw materials into tablets in such industries as medicine, chemical industry, electronics and food.

With high utilization rate of materials, reasonable structure, convenient operation, low volume, high pressure, low noise, little difference in tablet weight, continuous adjustment of filling depth of materials and tablet thickness, all performance indexes of this machine reach the level of an imported one. Fully conforming to requirements for pharmaceutical sanitation in China and global market, it is a preferred machine for scientific research institutes, pharmaceutical plant process rooms and hospital preparation rooms.

The machine adopts many novel designs during its designing process, so as to ensure that the production process is safer and more standard

Main Feature

1. The fully closed machine avoids dust cross contamination and conforms to GMP requirements
2. The safety protective device adopts more reasonable user-friendly design
3. The machine has wider operation space.
4. With prominent bearing capacity, it is suitable for production of a wider range of tablets.

Technical Parameters:

Model	DP-12	DP-25
Production Capacity	60pc/min	60pc/min
Max. Pressure	50kn	50kn
Max. Tablet Diameter	12mm	25mm
Filling Depth	20mm	20mm
Max. Tablet Thickness	8mm	8mm
Power	220V 50Hz 1.1kw	220V 50Hz 1.5kw
Dimension	550*450*750mm	580*500*830mm
Weight	100kg	150kg
