

## CRP-8 Filling Capping Machine

This capping machine is delicate designed for sealing plastic interior and exterior caps of cylinder bottles.

Especially for caps similar with edible bottles'. not only the capping speed is fast, but also high qualified rate of capping, reduces labor and increases productivity. This capper also suits recycle bottles well.

This machine is reliable, simple operation, reasonable design, high automation. Cap sorting and cap loading, can be done automatically as well with the ejector for ejecting incorrect caps.

### Technical parameter:

Items	Performance
Number of capping heads	8
Production capacity	≤6000 bottles/hour
container diameter	Φ50mm-Φ100mm
container height	80mm~280mm
cap diameter	Φ17mm~Φ35mm
Inner plug diameter	Φ12mm~Φ35mm
Power supply	AC220V ; 50Hz
Power	3.5 Kw
Machine dimension(L×W×H)	2000mm×1100mm×2200mm
Machine weight	800Kg
Vacuum source	6.67×10 <sup>-2</sup> Pa ,air exhausted 15 L/S
