

JX-J60FZ Automatic Dry Powder Filling and Packing Machine

The packaging machine is an automated equipment that automatically completes bag drawing, bag making, filling, metering, sealing, bag cutting, counting and coding during the packaging process.

Functions:

1. Imported PLC control system, Chinese and English color touch screen display.
2. One key to set the bag length.
3. Smart cursor positioning (complete trademark pattern).
4. Adjustable speed, low mechanical noise.
5. Stainless steel body, surface finishing treatment, smooth, easy to clean and disinfect.
6. The material contact part is made of high-quality stainless steel, which meets GMP requirements. It can be equipped with automatic feeding machine, multi-dimensional coding.

Application:

Powder Filling And Packaging Machine is suitable for pharmacy, food, household chemicals, plastic products and other special industry and other loose type and granule material. Such as seeds, Chinese Drugs, feeding stuff, medicinal granules, salt, sugar, soup blend, oat, tea, active carbon, washing powder, dryer, etc.

Technical Parameter:

Host model	60
Production capacity	30-80 bags/min
Measuring range	0.5-80ml
Bag size	L40-140, W0-110mm
Film width	220mm
Edge banding type	Back seal three sides seal four sides seal
Total power	1200W
N.W.	230KG
Voltage	220V380V/50Hz, 60Hz
Packaging Materials	Composite paper/polyethylene, polyester/ship foil/ethylene, nylon polyethylene, etc.
Dimensions	800*700*600mm
