

## ***Round Bottle Vertical Labeling Machine Touch-Type Large-Scale LCD Panel***

The round bottles vertical labeling machine adopts advanced roll-to-roll labeling. It adopts computerized fiber optic control, synchronous tracking, and the label is controlled by stepper motor or servo motor. Automatically detects the dimensions of containers and labels, and automatically position to ensure labeling synchronously, precisely and automatically.

### **Technical Parameters:**

- Labeling speed: 100-250 bottles/ min.
- Conveying speed: 0-23meter/min. or adjustable
- Labeling accuracy:  $\pm 1$ mm
- Bottle size: diameter  $\Phi 20$ - $\Phi 80$ mm; height: min. 20mm
- Rolling paper inner diameter range:  $\Phi 76$ mm min.
- Rolling paper OD range:  $\Phi 300$ mm max.
- Voltage/ power: 220V/50Hz 200W
- Dimension(L×W×H): 1700×650×1300mm
