

## *Model SuperCount 18-3 Tablet & Capsule Counter*

The Pharma Packaging Systems Model SuperCount 18-3 is the latest evolution in electronic tablet counting, combining proven technology with the latest in electronic control systems including 'onboard' microprocessor for the highest level of reliability.

- 60 bottles per minute on 100 counts of tablets, soft gels or 0 to 00 capsules, 120 bottles per minute on 30 counts (subject to testing);
- Fills 3 bottles at a time, 9 vibrators for fast product feeding;
- Lightweight vibrator trays produce high output speed;
- High speed infrared sensors scanning at 34,000 times per second for high accuracy counting of all tablets and capsules as well as transparent soft and hard gelatine capsules;
- Integrated chip and dust extraction system;
- Designed to be easy to clean and maintain.

### **Features:**

- Product feed hopper mounted over vibratory trays;
- Pre-count gates are easily removed for cleaning without removing the actuator or mount;
- Tablet counter chutes feature telescoping design for different height containers;
- Simple, user friendly controls with 500 recipe memory;
- Optional vibratory funnels and product trap boxes for large products.

*Other Tablet & Capsule Counters and related machinery available from PallyPack/PPS including:*

- SuperCount 12-2 & SuperCount 24-4;
- PharmaCount 2-2;
- Vitacount 40 & Vitacount 60;
- Vericount & Vericount Batch;
- Bottle Unscrambler, Bottle Cleaner, PharmaLift and Desiccant Inserter;
- Inspectis Vision System utilizing high resolution colour cameras where defects can be detected; the customised camera system will detect defective products including wrong colour or shape, broken tablets and chips as well as verifying print, etching or break-line defects.
