

High Efficient Blender Green Tea Powder W-50

The mixing barrel of W type Mixer Machine is designed to be double cone shape. When the barrel rotates, the dry powder or particles are continuously lifted in the barrel, and then thrown and staggered to achieve rapid and uniform mixing. The material to be mixed by the double cone Mixing Machine must be dry material with fluidity. If you want to mix agglomerated materials or materials containing a certain amount of liquid, you can choose WI series Industrial Blender.

Technical Parameters:

- Model No.: W-50
- Application: Powder, Medicine Processing, Chemicals Processing, Food Processing
- Range Of Spindle Speed(r.p.m): 1 - 20
- Max. Loading Volume (L): 30
- Gross volume(L): 50
- Weight (KG): 160
