

KGF-8 Oral Liquor Filling & Sealing Machine

This machine is the main filling & sealing equipment of the oral liquor production line, which is mainly applied in the filling and sealing of 10 ml or 20 ml bottles.

Eight filling nozzles local track, no bubble, electromagnetic sent shock, sealing rate is high. Six screw cap, and the adjustment is convenient.

This machine combines filling and sealing, advanced design, compact structure, the Replacement of the bottles is very convenient.

Technical Parameters

Production capacity	6000 - 11000 bottles/hour
Applied bottle	10 ml or 20 ml, oral liquor bottle
Filling accuracy	$\pm 1\%$
Sealing rate	$\geq 99\%$
Power	2 KW
Power supply	AC,380V/50HZ 3 phase or customization
Overall size	2200 x 850 x 1620 mm
