

NJP-7500C/E Automatic Hard Capsule Filling Machine

The automatic hard capsule filling machine NJP-7500 makes the most single output in the world.

1. The rotary piping part of machine is totally enclosed, makes it easy to clean.
2. The machine adopts imported double lips polyester seal in upper and lower module single direction movement. So that the sealing performance is really good.
3. About the module cleaning station, our automatic hard capsule filling machine combines inhaling and blowing together to make sure there's no dust in high speed die hole.
4. At the locking station, our automatic hard capsule packing machine places a powder adsorption device.
5. And, at the products finishing station we place a capsule stuck ring to not let the powder float in the air.

Parameters

Machine Model	NJP-7500-CE
Work With	Powder or Grain
The Suitable Capsule Model	00#5#Capsule and Secure Capsule A-E
The Highest Production Capacity	450 000 capsules/hour
Motor Power	8.37 kW
Power	AC 380V; 50Hz
Noise	Less than 80 dB
Vacuum	-0.02 to -0.06 Mpa
Air Compression (Module Cleaning)	Gas Consumption: 0.2 m ³ /min Pressure: 0.3 to 0.4 Mpa
Dimension	1740mm×1420mm×2150mm
Weight	3500 kg
