

## *DFC-5L Automatic Bottle filling And Capping Machine*

### **Details:**

- DFC-5 L Filling and Capping Machine is a 2-in-1 piece of equipment which special design for big volume bottle from 3Litre up to 7Litre.
- OMRON PLC with easy to use switch, and equipped with a text screen to access the control panel system.
- A shut-off nozzle together with balance return serve to prevent bubble formation during the filling process.
- All parts in contact with filling material is made of stainless steel 304L to meet cGMP standard.
- Feature a adjustable torque capping head to adapt to different bottle covered elastic.
- No bottle-no-filling and no-bottle no-capping mechanisms included with the system.

### **Technical Data:**

Model	DFC-5 L
Capacity	800-1500 BPH
Filling Position	4
Volume of bottle	3-5L
Capping Head	1
Power	0.75Kw 220/380V
Air source supply	600L/min, 8Bar
