

## Horizontal Plastic Cup Filling and Sealing Machine **SKB-series**

The horizontal plastic cup filling and sealing machine is a kind of liquid & semi-viscous material packaging equipment for pure milk, yogurt, milk beverage, soya-bean milk, fruit juice, ice cream, seasoning, everyday chemical, among others.

### Features:

1. Suitable for pre-made round, square and triangular plastic cup, the linear stepping filling machine is applicable for sealing cups using aluminium foil or paper.
2. The horizontal plastic cup filling and sealing machine can complete cup feeding, liquid filling, cap sucking, cup unloading, and cup conveying, automatically.
3. The standard horizontal liquid packaging machine can be used for the filling volume of 50-500ml per cup. The special filling system and the CIP cleaning system satisfy strict sanitary requirement.

### Technical Parameters:

| Model                 | SKB-4D                 | SKB-6D                 | SKB-8D                 | SKB-10D                |
|-----------------------|------------------------|------------------------|------------------------|------------------------|
| Production Speed      | 30-50 cups/min         | 40-75 cups/min         | 50-100 cups/min        | 60-120 cups/min        |
| Power                 | 3.5kW                  | 5.5kW                  | 7kW                    | 9kW                    |
| Air Compression Ratio | 0.4m <sup>3</sup> /min | 0.6m <sup>3</sup> /min | 0.9m <sup>3</sup> /min | 1.2m <sup>3</sup> /min |
| Machine Weight        | 800kg                  | 1000kg                 | 1300kg                 | 1600kg                 |
