

## Semi Automatic Vacuum Tinplate Capping Machine YS

### Product introduction:

1. Reasonable compact structure, simple operation and maintenance, compact and practical, cost-effective.
2. Vacuum screw capping machine design is clever, a small but complete function;
3. Lid cap unscrewing torque adjustable size, tighten the percent of pass is high;
4. Vacuum size is adjustable and visual display, to guarantee the vacuum absolute standards; Ultimate vacuum can be more than 0.09 Mpa;
5. Replacement of different specifications of the bottle lid, simple adjustment, easy to operate;
6. Vacuum tinplate capping machine with the world famous brand electrical and pneumatic components, low failure rate, stable and reliable performance, long service life.
7. 304 stainless steel material, vacuum tinplate capping machine used mainly for the various glass bottle three (four) the size of iron cover automatic vacuum cover.

### Technical parameter:

Model	YS
Voltage	220V 50Hz 1500W
Suitable diameter	Φ30--Φ85mm (can customize)
Suitable height	Φ50--Φ180mm (can customize)
Working speed	50-180pieces/min
Size	350*790*460mm
G.W	180Kg
