

Resina®

RW-500 In-line Capping Machine

The RW-500 is the first In-line capping system designed to handle large size containers up to 2½ gallon, with caps up to 150 mm. It can handle speeds up to 300 per minute for smaller caps, and over 150 per minute with large size caps. The RW-500 comes equipped with our HES-12 (Hopper Elevator Sorter with 12" wide cap flights) for speedy bulk cap sorting, or optional HES-24 or HES-30 for higher speed cap delivery. Also, NEMA 4X control panel with touch screen HMI, patented Resina® gripper chain with molded gripper blocks, 13' of conveyor, and cap stabilizer are all standard.

Applications: The RW-500 is made to handle large caps ranging from 70-150mm.

Speed: The RW-500 is capable of speeds over 150 caps per minute depending upon container and cap size.

Function: To orient, cap, and tighten large diameter caps onto their designated containers.
