

Filling and Aluminum Foil Sealing Machine DK-series

This machine introduces the foreign filling technology, unit filling, aluminum foil cover forming, and sealing in one machine. It's widely used for food and pharmaceutical package; especially it's ideal equipment for various plastic bottle package and seal in milk packages, removing foam and high effective sealing finished products. It reasonably adopts the double-slope cover-punching technology and largely developed the foil usage. It adopts the integral motor design and the first-rate driving, so the running is steady and flat.
