

Multi-head Weigher Vertical Packing Machine RL420

Characteristics:

- Equipped with safety protection, can meet the firm safely management requires.
- Use intelligent temperature control machine to have accurate temperature; ensure the artistic and neat seal.
- Use PLC control servo electrical double-pull or single pull membrane structure, super touch screen gives the control center; maximize the whole machine control precision, reliability and intelligent zed level.
- This machine completes the whole packing procedure of measuring, loading materials, bagging, date printing, charging (exhausting) and products transporting automatically as well as counting.
- With error indicating system, helping to handle the trouble immediately.
- Make block bags and hanging bags according to customers 'different requirements.

Technical parameters:

Model	RL420
	Multi-head weigher vertical packing machine
Bag size	L80-300mm, W80-200mm
Packing speed	≤ 80bags/min
Total power	3kw
Compressed air cost	6-8kgf/cm ² , 0.15m ³ /min
Dimension	1350x1100x1700mm
Products	Puff snacks, dried fruits, candy, biscuit, deep-frozen food, sees, nuts
