

## VFFS-240 Automatic Granule Packaging Machine

VFFS-240 Automatic Vertical Form Fill Seal Packaging Machine is widely used for small-particle material packing, can make various of bags, the max bag width is 180mm, the maximum speed can reach 90bags/min.

### Features:

1. Model VFFS-240 automatic vertical form fill seal packaging machine is of a new type developed by our company for small-particle material in sectors such as agriculture, chemistry, foodstuff, etc.
2. This packaging machine integrates many functions, including bag making, filling ( exhaust packaging or aerated packaging), sealing, slitting, printing and counting.
3. Its packaging speed can reach 90bags/min.
4. It can produce pillow type bags, handbags, standing bags, etc.
5. This machine adopts a unique kind of stable film system without meander, and also adopts servomotor drive for film pulling whose operation is by touching with intuitive man-machine dialogue.
6. Compact and durable structure ensures continuous trouble-free operation of this machine.

### Technical Parameters:

Bag type	Pillow type bag,Gusseted bag, Hole puncher bag
Speed	30~90bags/min
Bag size	(50~280)×(70~180) mm(L×W)
Compressed air requirement	0.6 MPa 0.36 M3/min
Reel outer dia	Φ400 mm
Core inner dia	Φ75 mm
Machine weight	800 kg
Power source	3 kW 220 V±10% 50 Hz
