

Particles Beverage Filling Machine GXGF30-20-20-6

GXGF30-20-20-6 type four in one flesh Filling Machine is a set of washing (washing, disinfection liquid pure water rinse), filling, filling and capping pulp juice in one of the (high temperature) Filling Machine In two, pulp and juice filling material in the flesh to solve the problem of uneven content.

The host adopts fully closed windows, and bottle filling zone isolation zone, the filling part can do 100 local cleaning, ensure the filling zone environment to achieve the desired temperature in filling. Bottle with active clamp in handover, ensure the maximum mouth unchanged to reduce the adjustment operation of the equipment of bottle type.

The host of interaction between a SEW reducer and coupling transmission power, to ensure the smooth operation of the host.

Technical parameter:

- Model: GXGF30-20-20-6
- Production capacity: can 8000BPH (phi 38 bottle) /7000BPH (phi 28 bottle)
- Filling volume: 500-1000 ml
- Bottle height: 160mm-330mm mm
- Total power: 6.5KW
- Consumption: 0.8M3
- Size: 6940x3210x2800 mm
- Host weight: 7000Kg
