

Rotary 6 Heads Water Bottles Filling Machine CGF18-18-6

Hot sale automatic monobloc water filling machine is used to fill pure water, mineral water and other non-carbonated beverage.

All the machine part which contact with liquid is high quality stainless steel 304. The relative fittings are from international famous brand.

The automatic monobloc water filling machine is equipped with suspension type air conveyor and frequency control of motor speed.

Main Features:

1. Using the wind sent access and move wheel in the bottle directly connected technology; canceled screw and conveyor chains, this enable the change the bottle-shaped become easier.
2. Bottles transmission adopt clip bottleneck technology, bottle-shaped transform not need to adjust the equipment level, only change related the curved plate, wheel and nylon parts is enough..
3. The specially designed stainless steel bottle washing machine clip is solid and durable, no touch with the screw location of bottle mouth to avoid secondary pollution.
4. High-speed large gravity flow valve filling valve, filling fast, filling accurate and no liquid lose.
5. Spiraling decline when output bottle, transform bottle shape no need to adjust the height of conveyor chains.
6. Host adopt advanced PLC automatic control technology, the key electrical components from famous company such as Japan's Mitsubishi, France Schneider, OMRON.

Technical Parameters:

Type:	Automatic Bottle Filling Machine
Automatic Grade:	Automatic
Filling Heads:	18Heads
Dimension(L*W*H):	2100*2300*2500
Structure:	Rotary
Usage:	Beverage Packaging
Key Selling Points:	2020 New Product
Bottle Diameter:	50~110mm
Control System:	PLC (Siemens, Mitsubishi)
Filling Capacity:	8000bph
Washing Heads:	18Heads
Capping Heads:	6Heads
Filling Material:	Flowing Liquid
Bottle Shape:	Round Or Square
Filling Accuracy:	99.9%
Bottle Size:	200-2500ml (Customized)
Bottle Height:	160~320mm
Driven Type:	Electric
