

SL-SBZL500 Automatic Conveyor Machine

SL-SBZL500 series automatic conveyor is used for conveying, sorting, and sorting materials, without manual assistance, efficient and easy to operate.

Special Features:

1. Adopt PLC & program software, easy operating, and setting. Auto-human touch screen and three-color warning light, self failure diagnosis, clear failure display.
2. Fully automatic program-controlled with servo motors, highly stable and reliable
3. Flexible in color sensor settings, paper feeding self-tracking, and correction during packing, providing a consistent packing style and a good product appearance.
4. Self-protection for abnormal product
5. Online product feeding status monitoring-only feeding wrapping paper when the product arrives at the desired position, which keeps paper consumption at an extremely low level.
6. Removable truckle with the machine, height can be adjusted.
7. Large space switch power supply, an electrical device's brand can be chosen.
