

## *OC-320E Semi Automatic Chain Packing Machine*

The Semi Automatic Chain Packing Machine is designed for automatic packaging of granules, such as free-flowing grains, sugar and salt, nuts, etc. Various kinds of bags can be customized to meet customers' needs, such as back seal bags, 3/4 side seal bags, round corner bags, straight cut bags, special cut bags, etc. This Semi Automatic Chain Packing Machine has automatic detection and replenishment system to truly achieve no empty bags.

Our Semi Automatic Chain Packing Machine is easy to assemble and disassemble, and the conveyor belt can be cleaned directly with water for simple maintenance, which plays the role of lifting materials and blocking the side leakage of materials on both sides. Thermostatic heat sealing cutter can seal the front and back ends of packaging products to avoid rolled edges or holes in the sealing position. It can be directly connected to the production line, so that the whole process of dividing, sorting, feeding, filling and sealing can be automated, which greatly reduces labor cost and improves production efficiency.

### **Application:**

Widely used in food, snacks, medicine, such as noodles, fruit salad, vegetable salad, potato chips, dried fruits, dried meat, dried fish, alcohol cotton, etc.

### **Technical specifications:**

Type	OC-320E
Film width	Max.320mm
Bag length	80~240mm
Bag width	50~150mm
Packing rate	5~70bags/min
Measuring range	150~800ml
Machine weight	550KG
