

JH700/1200 Plastic Vacuum Thermoforming Machine for Fruit and Veggie Containers

It is suitable for forming PS, HIPS, PVC, PET, PP, flocking sheet that can produce varieties of blister package and blister tray. For example: curatorial injection tray, oral liquid tray, mobile telephone tray, cookies tray, one-off tableware etc.

Technical parameters:

Model	BC-700/1200A-1
Length of forming	760-1200mm
Width of forming	500-700mm
Height of forming	≤165mm
Production Speed	60-720Cycles/h
Power of oven	24KW (Upper Oven)
Power of vacuum pump motor	3Kw
Vacuum pump capacity	100m ³ /h
Power of air compressor	15Kw
Air displacement of air compressor	2m ³ /min
Voltage	380/220V 50HZ
Overall dimensions	7950*1450*2550mm
Weight	3000Kg
