

Weighing filling packing machine KF01-G

Introduction of granule filling machine

- Granule filling machine control by microcomputer, make packaging more precise, fast, fully automated packaging process.
Large dose granule filling machine spiral points installed parts contacting material are all made of stainless steel materials, no pollution materials.double damping structure, nut packaging machine run smoothly, low noise.
- Oblique feeding, don't squeeze the damage material, especially suitable for brittle material packing.
- Granule filling machine packing speed adjustable. equipment set weighing excessive alarm.
- Granule filling machine is particularly suited to low density, irregular granular materials packaging

Technical Parameters:

- Packing specification :5-100g 100-500g 500-2000g 1000-3000g 2000-5000g
- Packing speed :1200-2000 bags/hour
- Accuracy level : 1.0%
- Voltage power :AC220V 500W
- Weight :200Kg
- Packing Size : 600×800×1850mm
- Container :Aluminum foil bag, paper bags, plastic bags, jar, etc
