

WB-J4 Jam and Paste Filling Machine

Jam and paste filling is used for filling semi-liquid products without or with small particles: like honey, butter, olive oil, tomato sauce, shampoo, body wash, liquid detergent, etc. The specifications of Jam and paste filling can be customized according to your needs.

Performance feature:

1. This machine has good appearance and structure, it's currently the most advanced sauce filling machine and can be customized with 4/6/8/12/14/ etc filling heads according to customer's production capacity.
2. Adopts positive displacement plunger pump for filling, high precision, large range of adjusting dosage, can regulate filling amount of all the pump body as a whole, also can adjust a single pump slightly, quick and convenient.
3. Plunger pump filling system has features of no adsorbing drugs, good chemical stability, high temperature resistance, corrosion resistance, abrasion resistance, long service life, has unique advantages when fill some corrosive liquid.
4. Used for various viscosity liquid filling, frequency control, automatic count.
5. Main electrical elements adopts foreign well-known brand.
6. Machine body is made of 304 stainless steel, full compliance with GMP standard.

Technical Parameters:

Model	YB-J4
Filling head number	4
Filling volume	50-1000ml
Capacity	10-40bottle/min
Power	5.0kw
Voltage	220V
Weight	750KG
Dimension	L:2200*W1500*H1900mm
Pass rate	≥98
