G1WTD-1000W Hot Pot Sauce Filler with Mixer

G1WGD-mixer-stirring and heating liquid and paste filling machine for cream shampoo, cosmetic, toothpaste.

Brief introduction:

- 1) Paste filling machine is the automatic filling system using compressed air as power, which is composed of precision pneumatic components. The paste filling machine has the features of simple structure, reliable and convenient adjustment.
- 2) This paste filling machine also adapts to all kinds of paste, viscous paste filling. This paste filling machine can work in the inflammable and explosive environment. It is the ideal filling equipment of pharmaceutical, chemical, food, cosmetics and other industries.

Technical features of paste filling machine:

- 1) This paste filling machine is semi-automatic piston paste filling machine.
- 2) This machine has reasonable structure, compact shape, and convenient operation.
- 3) The fact that the part in contact with the material is made of 316# stainless steel, which brings qualified anti-corrosion performance.
- 4) Filling volume and filling speed can be adjusted, and the precision is high.
- 5) Filling head adopts anti-leakage and lifting device.

Technical data:

| Model | G1WTD-1000W |
|------------------|-----------------------------------|
| Voltage | 110V/220V,50HZ~60HZ |
| Mix Power | 250W |
| Filling Speed | 5-12 pcs/min (For reference only) |
| Filling Range | 100-1000ml |
| Filling Accuracy | About ±1%(Test by water) |
| Air compressor | 0.4-0.6MPA |
| Dimension | 110(L)x46(W) x76(H)cm |
| Weight | 61KGS |
