

## *VL320-12 heads Full Automatic Packing Machine*

It (full automatic) is a packing machine mounted with 12 heads weigher, which saves space and also more economical. It is suitable for a wide range of granular products, not only for food but also non-food, such as beans, sugar, peanuts, frozen foods, milk powder, coffee, as well as nuts, screws, etc.

### **Features:**

1. Using triple servo controlling system, more stable operation, more accurate running, and more efficient
2. The whole machine adopts 3mm&5mm thick stainless steel sheet metal processing and assembly, making it more stable. And the packing speed is fast due to the core components by special optimization design.
3. Pulling and releasing belt by servo drive, make it more accurate.
4. The equipment accessories adopt electrical components with famous brand both domestic and international and ensure more stable and durable performance through years of market tests.
5. Its design conforms to GMP standard and has passed CE certification.

**Machine Parameters:**

Model	VL320-12heads
Packing speed	40-100 bags/minute
Weigher	12 heads, 0.8L
Weighing Range	3-300g
Accuracy	±0.3-1.5g
Film width	120-320mm
Bag size	L:50-190mm, W:50-150mm
Bag Type	Pollow Bag
Control system	PLC+ servo+ color touch screen
Power supply	1N+PE/50HZ/AC220V
Air consumption	0.6—0.8Mpa, 0.3—0.5m³/h
Dimension	L1541*W1304*H2481mm
Machine structure	304 stainless steel
Weight	700kg
